SOIL SOLUTIONS FOR A HEALTHIER COMMUNITY

In 1996 Sunmark Seeds International, Inc. expanded its product line to include sports fields and the soil amendments used on them. By this **Sunmark Sports** was born.

We have quickly grown to provide Oregon, Washington, Northern California, Idaho, Montana, and Utah with the best solutions for sport field products. We have extensive knowledge of infield soils, turf zone soils, soil conditioners, top dressing, mound repair kits, tarps, warning track material, equipment, and technical

assistance. **Please see our web site [www.sunmarksports.com](http://www.sunmarksports.com) for more information.**

Players Choice Soil Amendments are lightweight aggregates ranging from Vitriified Clay/Shale to Diatomaceous Earth. These products are meant to be amended into the playing surface of a baseball or softball diamond at a rate of 10% - 20% per inch and/or top dress of 1/4" - 1". Players Choice Infield Conditioners will increase a soils stability, strength, water absorption, moisture retention, recovery, and color.

Product	Description	Pricing Per Bag	Bulk Pricing Per Ton
	<b>Players Choice Red Infield Conditioner™</b> provides an exceptional dark red playing surface, soil conditioner, and top dress to field managers looking for that professional look. PC Red Infield Conditioner, which is vitriified shale, will absorb moisture, add porous space to clay soils, increase soil strength, and help retain moisture.	\$12.95	\$250.00 (Min. 5 tons)
	<b>Players Choice Gray Infield Conditioner™</b> is natural looking vitriified shale, which can be used as either a playing surface or soil conditioner. PC Gray Infield Conditioner will absorb moisture, reduce mud, act as a soil stabilizer, add porous space to clay soil, increase soil strength, and help retain moisture.	N/A	\$215.00 (Min. 5 tons)
Product	Description	Pricing Per Bag	Pricing Per Pallet
	<b>Players Choice Calcined DE Infield Conditioner™</b> is a calcined diatomaceous earth, which should be used to improve drainage, porous space, and water retention for soil. PC Calcined DE Infield Conditioner is the most absorbent and retains the most moisture out of all the infield conditioners.	\$12.95	\$485.00
	<b>Players Choice Calcined DE Drying Agent™</b> can be used to quickly dry puddles and stabilize muddy conditions. The finer gradation has more surface area to dry the field quicker, reducing rain delays, keeping the field playable.	\$13.95	\$495.00
	<b>Players Choice Mound Clay™</b> is a unique dark red packing clay that can be used to build, repair, and renovate the mound, batters boxes, and catcher's box. Once compacted, this material will create a hard subsurface that can withstand a consistent, high stress beating.	\$13.95	\$490.00
	<b>Players Choice Mound and Home Plate Kits™</b> are an all-inclusive mound and home plate repair package. Each MHP Kit contains enough brick, clay, and top dressing to do a full size mound, both batter's boxes, and the catcher's box.  <b>Kit includes:</b> 10 bags of PC Red Infield Conditioner, 10 bags of PC Mound Clay and 275 Clay Bricks	N/A	\$725.00 per kit

Product	Description	Pricing	
	<p><b>Players Choice Unfired Clay Bricks™</b> are clay bricks that have been compressed at 1500 pounds per square inch. This product provides a stable platform that can reduce maintenance up to 50%.</p>	<p><b>\$2.25</b> per brick</p>	<p><b>\$700.00</b> w /400 bricks per pallet</p>
	<p><b>Green Choice Axis®</b> incorporated into the turf zone soils, increases air and water capacities. Axis® reduces compaction, firms up soggy soils, loosens hard to work soils, provides better drainage, increases infiltration rates, increases plant available water, and aids in nutrient transfer; resulting in dramatically improved root growth and improved microbial activity.</p>	<p><b>\$18.95</b> per bag</p>	<p><b>\$595.00</b> per pallet</p>
	<p><b>Green Choice Dakota Organics™</b> is a natural highly concentrated organic material. The stability makes it a perfect contributor to plant growth. (Carbon to Nitrogen ratio of 25:1 to 16:1). Dakota Organics pH of just slightly lower than neutral is perfect for plant feeding of nutrients. This ideal pH makes Dakota Organics the perfect home for positive microbials for much healthier and successful plant life.</p>	<p><b>\$24.50</b> per bag</p>	<p><b>\$800.00</b> Super Sack 5.6 yd ea</p>

Please call for quantity discounts. Pricing is FOB Sunmark facilities.

Players Choice ES Soil Mixes are premium soil blends used to build, renovate, and restore the top 3 to 6 inches of the soil profile on athletic fields. Depending on your need, Players Choice ES Soil Blends provide a wide selection of ball response, traction, playability, percolation, and compaction options.

Product	Description	Pricing Per Yard
	<p><b>Players Choice ES 5.5™</b> provides a high quality playing surface to programs desiring a balance between red clay, silt, and sand. ES 5.5 resembles the infield of most professional baseball fields. This blend works best in regions with less than 40" of annual rainfall.</p>	\$37.50
	<p><b>Players Choice ES 4.6™</b> is a premium sand based soil blend amended with a moderate amount of red clay. ES 4.6 will drain well and recover quickly, yet has enough clay to remain firm. This blend works best in regions with more than 40" of annual rainfall.</p>	\$37.25
	<p><b>Players Choice ES 3.7™</b> is a premium high sand soil blend that has been amended with a small amount of red clay. ES 3.7 will withstand extreme moisture, recover quickly, and play soft. This blend works best in regions with more than 45" of annual rainfall.</p>	\$36.00
	<p><b>Players Choice ES 6.4™</b> provides a high quality playing surface, to programs wanting the benefits of a red clay infield. ES 6.4 will shed water rather than passing it, yet has enough sand to remain soft when wet. This blend works best in regions with less than 35" of annual rainfall.</p>	\$47.75
	<p><b>Players Choice ES 7.3™</b> is the highest quality infield surface on the market, using a maximum amount of red clay as its base. ES 7.3 has outstanding soil strength, will shed all moisture to turf areas, and will play extremely fast. This blend works best in regions with less than 28" of annual rainfall.</p>	\$69.50
	<p><b>Players Choice ES 8.2™</b> is an extremely high clay content soil blend with 80 percent being clay. It should be used with caution as it can become unstable in high rainfall areas. Use this blend to bring up the clay content of soils that are too high in sand, and to give a sand based soil blend better water and nutrient retention.</p>	\$75.00
	<p><b>Players Choice ES 2.8™</b> is a soil blend that is 80 percent sand. This is used as a base soil or as an amendament for soils that are high in clay and need to have larger particle size blended in. This blend has been screened and will combine well with native soils.</p>	\$30.00

Players Choice Soils Call for quantity discounts.

Players Choice All Play Infield Mixes are premium soil blends used to build, renovate, and restore the top 3 inches of the skinned area on a baseball or softball diamond. Depending on your need, All Play blends provide a wide array of ball response, traction, playability, percolation, and compaction options.

Product	Description	Where to Use	Pricing Per Yard
	<p><b>All Play™ with Players Choice Red</b> is a premium all-weather engineered soil blend. This blend will produce a superior playing surface that will outplay and outlast a typical infield. PC Red will add pour space, absorb moisture and reduce rainouts while giving your field a rich red professional appearance.</p>	Baseball, Softball Infields	\$ 85.00
	<p><b>All Play™ with Players Choice Gray</b> is a premium all-weather engineered soil blend. This blend will produce a superior playing surface that will outplay and outlast a typical infield while being less expensive than other All Play™ mixes. PC Gray will add pour space, absorb moisture and reduce rainouts while giving your field a professional playing surface.</p>	Baseball, Softball Infields	\$ 75.00
	<p><b>All Play™ with Players Choice™ Calcined DE</b> is a premium all-weather engineered soil blend. This blend is the best for high rainfall areas as the Calcined DE is the most absorbent amendment on the market today. This soil blend will provide years of excellent play in very wet, soggy conditions.</p>	Baseball, Softball Infields	\$100.00
	<p><b>All Play™ with Turface™</b> is a premium all-weather engineered soil blend. This blend reduces infield compaction, holds moisture, and increases drainage. Turn muddy conditions into dry, safe surfaces that will allow play to resume quickly after the rain stops.</p>	Baseball, Softball Infields	\$120.00
	<p><b>All Play™ with Pro's Choice™ Calcined Clay</b> is a premium all-weather engineered soil blend. This blend is designed to meet the challenges of wet, dry or compacted infields. This unique durable granule helps create passageways for drainage and eliminate compaction for truer bounces and safer play.</p>	Baseball, Softball Infields	\$120.00

Players Choice Turf Zone Soil Mixes are premium blends of organics, sandy loam, and lightweight aggregates. They are meant to be used for building, renovating, and restoring the turf areas of all athletic fields and sports turf. Depending on your site, Turf Zone Soil Blends provide a wide array of bulk density, percolation, nutrient retention, moisture retention, and growing medium options.

Product	Description	Where to Use	Pricing Per Yard
	<p><b>Turf Zone™ ES with Axis®</b> is a superior engineered soil blend for the turf areas. Axis® is made from naturally occurring diatomaceous earth. With the addition of EcoLive™ Organics with Mychorrhize it stimulates germination and develops extensive root growth for healthy turf. This blend increases air and water capacities, reduces compaction, firms up soggy soils, provides better drainage, increases infiltration rates, and aids in nutrient transfer to turf, resulting in dramatically improved root growth.</p>	<p>Turf areas, Football, Soccer, Parks and Open Spaces, Baseball and Softball Outfields, Golf Courses, Rugby Fields, Polo Fields, Sports Turf.</p>	<p><b>\$106.50</b></p>
	<p><b>Turf Zone™ ES with Dakota Organics</b> is a superior engineered soil blend for all green zones. With the addition of EcoLive™ Organics with Mychorrhize it stimulates germination and develops extensive root growth for healthy turf. Turf Zone™ ES with Dakota Organics creates an excellent environment for micro-organisms. This unique natural organic growth enhancer is essential for successful development of root systems.</p>	<p>Turf areas, Football, Soccer, Parks and Open Spaces, Baseball and Softball Outfields, Golf Courses, Rugby Fields, Polo Fields, Sports Turf.</p>	<p><b>\$ 96.50</b></p>
	<p><b>Turf Zone™ ES with Players Choice Gray</b> is an economical choice for improving your turf zone soils. This blend will increase absorption and water holding capacity, along with adding pour space for better nutrient uptake. With the addition of EcoLive™ Organics with Mychorrhize it stimulates germination and develops extensive root growth for healthy turf.</p>	<p>Turf areas, Football, Soccer, Parks and Open Spaces, Baseball and Softball Outfields, Golf Courses, Rugby Fields, Polo Fields, Sports Turf.</p>	<p><b>\$ 76.50</b></p>
	<p><b>Turf Zone™ ES with Turface™</b> is a premium engineered soil blend that helps turf in native soils survive under intense traffic. With the addition of EcoLive™ Organics with Mychorrhize it stimulates germination and develops extensive root growth for healthy turf. It adds porosity to prevent compaction in high traffic areas. Along with holding moisture and nutrients to provide a permanent balance of air and water space to increase drainage and prevent muddy conditions that destroy turf.</p>	<p>Turf areas, Football, Soccer, Parks and Open Spaces, Baseball and Softball Outfields, Golf Courses, Rugby Fields, Polo Fields, Sports Turf.</p>	<p><b>\$121.50</b></p>
